Scheduling Service Calls

We will make contact with you to startup, mid-season check and to winterize your sprinkler system. The following are some items to remember when scheduling your appointment.

You don't have to wait on us to call you to schedule an appointment. If we have not called you and you are ready just give us a call.

Please don't wait until the last minute to schedule your appointment. Sometimes we schedule out as many as 7 days in advance.

Spring startups are always hard to schedule. We don't know if there will be any repairs to be made. When making an appointment allow time around the scheduled appointment for these delays. We will call and let you

know what to expect. If it doesn't work then the office can re-schedule another time or day.

We have implemented a "No Show" fee when we arrive at the scheduled day and time. If no one is at the property to let us in to perform the service we will call the numbers we have on file and wait 15 minutes. After the 15 minutes with no contact we will leave and you will be charged \$55.00.

Hunter Wi-Fi Controller

Hunter Wi-Fi Controller with Hydrawise Web-Based Software

Manage your irrigation controller from anywhere worldwide using your smart device or the web browser with Hydrawise cloud software. Predictive watering adjusts schedules based on temperature forecast, rainfall probability, and wind and humidity to provide maximum water savings while keeping your landscape healthy and beautiful.

Hydrawise cloud software is a user-friendly water management software. Each homeowner can use predictive watering adjustments to achieve water savings. Homeowners can see how much water is being saved. It can send

alerts to you with certain problems.

All you need to install the controller is a Wi-Fi signal of at least 3 bars at the location where the controller is or will be installed.

They have a model that will retrofit a newer Hunter Pro-C controller.

Go to this link to find out more about Hydrawise Wi-Fi enabled controllers.

<https://www.hydrawise.com>

Give Steve a call to answer any questions, to give you a demonstration or to get you an estimate to replace your existing controller.

Conserve Water by Managing Your Controller

I find that most systems waste water by overwatering. Below are some tips to save money by reducing water usage.

- 1) Install a rain sensor or a Wi-Fi enabled controller.
- 2) Turn the controller to the "OFF" position during periods of rain or cool temperatures.
- 3) Check the run times on each zone to make sure you are not putting on too much water.
- 4) Replace all sprinklers that have excessive water coming from the sprinkler riser.

We can help with any of the above by giving us a call .

IRRIGATION NEWS

IRRIGATION SERVICE SCHEDULE

Listed below is an explanation of the different types of service we can furnish to you for your irrigation system. If you have any questions, please call and I will be happy to help.

IRRIGATION STARTUP:

- ☞ Pressurize the system and check for leaks.
- ☞ Leave the controller on standby or "OFF" mode.
- ☞ Cycle through each zone to check for leaks and rotation of sprinkler.
- ☞ Clean debris from heads if needed.
- ☞ Parts & time to make repairs will be billed extra.

IRRIGATION WINTERIZE:

- ☞ Turn off water source.
- ☞ Blow out water from all lines with compressed air.
- ☞ Leave controller either unplugged or in the "OFF" mode.
- ☞ Any repairs needed to winterize the system will be billed extra.
- ☞ The ball valves on the backflow will be left in a 45 degree position.

CONTROLLER SEASONAL ADJUST:

- ☞ Make seasonal adjustments to the controllers program.

MID-SEASON SYSTEM CHECK:

- ☞ Check controller and valves for proper operation.
- ☞ Check and adjust sprinkler heads for proper coverage and distribution.
- ☞ Adjust controller for proper seasonal watering needs.
- ☞ Inspect for line leaks and broken sprinkler heads.
- ☞ Parts & time to make repairs will be billed extra.

EXTENDED IRRIGATION SERVICE:

- ☞ Parts & labor to repair or replace existing controller, low voltage valves, sprinkler heads, outside piping or wiring which fail under normal use.
- ☞ Pumps & backflows are excluded (we will service them but will be billed on a time and material basis).
- ☞ Service connections from backflow to water source is excluded.
- ☞ Failure of system parts due to lightning, flood, vandalism, neglect or mis-use are excluded.

IRRIGATION SERVICE LABOR RATE (Non Prevailing):

Danville address and area:

\$ 75.00/ Man Hour.

Outside the Danville area:

\$ 85.00/ Man Hour.

1 Hour Minimum, Billed In 1/4 Hour Increments.

NO SHOW FEE:

A \$ 55.00 fee will be charged if we show up for a scheduled appointment after a 1/4 hour wait and no one is there to give us access to the areas we need to perform our work.
